

# Walker's Exclusive Nine Point PLUS COMPUTER TUNE UP

With **Walker's Exclusive Nine Point PLUS Computer Tune Up** you can increase your computers performance without the expense of buying a new computer or hardware.

- 1. Perform a Virus Scan and Report**  
We will scan your computer for any existing viruses and report the findings. We will also confirm that your current anti-virus software is set to update on a regular basis.
- 2. Check for Adware/Spyware and Report**  
Adware and Spyware are sneaky little programs that load themselves on your machine and cause, amongst other things, your home page to automatically switch and allow for those annoying pop-up ads. We will scan your computer and report any findings.
- 3. Check for Windows OS Updates/Service Packs Updates**  
We will check your operating system for any updates or service packs that are available.
- 4. Clean Out Temporary Internet Files and Cookies**  
As you use the internet, temporary internet files and cookies accumulate, decreasing your computers performance over time. We will clean out all of these files, increasing the general performance of your computer.
- 5. Test System RAM and CPU Performance**  
We will test and confirm the performance of your computer and adjust all settings to optimize your computers performance.
- 6. Physical Cleaning**  
We will perform a thorough cleaning to make sure that it is free of dust that can damage the motherboard and other essential parts.
- 7. Check Case and CPU Fans for Full Functionality**  
We will confirm that all fans are in working order, protecting your computer from overheating and causing permanent damage.
- 8. Check Voltage Output on Power Supply**  
We will confirm that your power supply is providing the correct voltage to your computers components.
- 9. Check Connectivity of All Cables and Connectors**  
We will confirm that all of your cables, connectors and jumpers are connected and set correctly.
- 10. PLUS Services for Internet 49 Members**  
For Internet49 Members we will check that all dial up networking, email and internet settings are set correctly. Internet49.com User Name: \_\_\_\_\_
